

# NaviLink<sup>™</sup>

Wi-Fi remote  
access  
anywhere  
in the world  
to control  
your Navien  
systems

Peace of mind  
at your fingertips

### Optional new Wi-Fi remote control system

NaviLink makes it easy to communicate with your Navien systems anywhere internet service is accessible. The NaviLink module attaches easily to any new or existing\* Navien NPE series tankless water heater, NCB series combi-boiler and NHB series boiler.

Once installed, simply download the free app on your smartphone or tablet. Then you will be able to turn your unit on or off, change the water temperature, monitor system status and even activate the recirculation system on your NPE-A tankless water heater with an installed HotButton™ kit.

Relax... with NaviLink you will have the convenience and control of all your Navien systems right in the palm of your hand.

\*Existing installations may require the purchase of a new main PCB and front control panel.

**NPE**  
Condensing tankless  
water heaters

**NCB-E**  
Condensing  
combi-boilers

**NHB**  
Condensing  
boilers
